

Software System Implementation Project

(Appendix 6)

This software package is associated with a consulting contract to transition a manual accounting system to a computerized G/L package supported by Microsoft Server SQL 7.0. In addition to this process transfer, the network required evaluation for Y2K compliance, network system upgrades, year-end closing procedures, and to train the appropriate office personnel in basic accounting theory and software usage.

Shelby Systems Software Options

Shelby Church

- ▶ Attendance
- ▶ Chek-In
- ▶ Contributions
- ▶ GlobaFILE
- ▶ Membership
- ▶ Misc. Names and Addresses
- ▶ Prospects
- ▶ Reaching
- ▶ Registrations
- ▶ Pose n' Print
- ▶ Servant
- ▶ ShelbyACH
- ▶ ShelbyPROFESSOR
- Financial
- ▶ ShelbyPROFESSOR Non-Financial
- ▶ ShelbyQuery
- ▶ Terminal Services Optimizer

This suite of applications is designed for use by churches, parishes, and other ministries, which track individual information. These offices typically serve as a gathering point not only for membership, but also for information regarding prospects, attendance, family life centers, and other information concerning their congregations. Flexibility with user-defined fields and dated comments assure churches of tracking individual congregational needs and denominational concerns.

Shelby Software Partnerships

Partners

Professionalism is a goal of many companies; few have been as successful as Shelby in demonstrating this characteristic.

Software Developers

The company has development relationships with Microsoft and Novell, enabling programmers to prepare customer software in native environments taking advantage of the most current utilities and techniques. The applications are written in Microsoft Visual Basic using MSDE, Microsoft SQL Server 7.0 or Microsoft SQL Server 2000 as the database management system.

Professional Relationships

These include organizations and businesses that help foster Shelby's goal of meeting customer needs and knowing trends that could affect these customers.

National Association of Church Business Administration

Christian Management Association

National Catholic Stewardship Association

American Society for Church Growth

Evangelical Development Ministries

Leadership Network

Better Business Bureau

Business Associates: ShelbyCONNECTIONs

The investment of churches and other organizations into computer systems is non-trivial. However, the greater value is the data that is stored in these units. Shelby believes the organization owns this data; no stumbling block should prohibit its use. Therefore, the company has made the commitment to allow data usage in whatever way desired by the customer. The most obvious example is the ability to export data to spreadsheets, word processors, and editors of choice – which Shelby has done for over a decade.

But further commitment was made. The company pioneered the idea within this business niche of extensive connectivity by searching out products that support and extend the missions of its customers. Listed below are the products and the businesses producing them:

PhoneTree PLUS - USB and PhoneTree MVP - USB – Personal Communication Systems

Streets on a Disk – Klynas Engineering

CrossCheck – CrossCheck Marketing

ShelbyCHEKGARD – partnered with DSI Associates

ShelbyMAILROOM – partnered with Satori Software

MLS and Concourse libraries – Book Systems, Inc.

Forms and stationary – Western Business Systems

System support and consulting – Diakoniva

Contribution envelopes – National Church Supply, American Church, and Cathedral Corporation
